

WHAT WILL YOU HAND IN?

Create a word document, pdf or use the "write submission" option in blackboard to provide the following:

1. Usability –

- a. Who evaluated your site?: **Alison Kunzwiler**
- b. What did they say about the purpose of the page?

She said the purpose was to describe the different types of earrings available as well as gain an understanding of the risks involved before a person gets a piercing.

- c. What are the main elements they recalled?

The main element she recalled was the picture in the header, and she said the colors went well together.

- d. Who do they think the intended audience was?

She was correct to think the audience is intended for people curious about piercings.

2. Site Testing – What changes did you make or what notes did you write about proofing changes?

I made changes to the name of my title, recognizing that “All Things Earrings” should be “All Things Piercings” since I talk about other body piercings. I also want to change the look of the list and am still figuring out how. I am also thinking of modifying the font size.

3. Favicons - Submit the URL for a page that shows your favicon.

<https://aktran-su.github.io/ist263/project7/basics.html>

4. Google Fonts - Submit the URL for a page that shows your google font.

<https://aktran-su.github.io/ist263/project7/home.html>

https://aktran-su.github.io/ist263/project7/home_style.css

5. Domain Names - Submit the available domain name you researched above and tell me why that is a good domain name for your project.

The domain name I chose was piercingcheck.com or allthingsearrings.com. The first domain was one that simply sounded better and more memorable but also shows the

user that my website is available for any questions they have about piercings. The second domain was the name of my site already and might be better for branding.

6. Submit answers to the following:

- a. What questions did you have about the lab? What didn't you fully understand?
None.
- b. What was the hardest part of the lab?
The hardest part was the favicon icon but I was able to fix my mistakes.
- c. Rate your comfort level with this week's topics.
1 ==> I can do this on my own and explain how to do it.
