

WHAT WILL YOU HAND IN?

Create a word document, pdf or use the "write submission" option in blackboard to provide the following:

1. Submit the URL for the slideshow.

<https://aktran-su.github.io/ist263/lab12/lab12.html>

2. Answers to the following question:

- a. Our slideshow is very basic. What functionality could you add to make it a better slideshow? List at least 3 improvements. I'm not looking for code here just your thoughts.

I think there could be a nice hover function when you go over a planet that also displays a little box showing what type of planet you are hovering over. Another improvement would be enhancing the design of the slideshow by adding better styling, such as smoother transitions between images, animations, or more visually appealing colors and layouts. A third improvement would be adding navigation features, such as "next" and "previous" buttons. the planets without needing to click each thumbnail.

3. Submit answers to the following:

- a. What questions did you have about the lab? What didn't you fully understand?
None

- b. What was the hardest part of the lab?
The hardest part was actually understanding that the text going on the side of the planet can be done using padding.

- c. Rate your comfort level with this week's topics.
1 ==> I can do this on my own and explain how to do it.
