

Alyssa Tran

Lab 5

1. Submit the GitHub URL for the contact page with your LinkedIn logo on it.
<https://aktran-su.github.io/ist263/lab05/contact.html>
2. Submit the GitHub URL for the bio page with your photoshop image on it.
<https://aktran-su.github.io/ist263/lab05/tran-bio.html>
3. Scaling an image down in Photoshop is better because it reduces the image file size and not just the display size. When you only change the width attribute in HTML, the browser still downloads the full-sized image, which slows down the page loading.

4. Answer the following: What main message were you trying to communicate with your original image? Explain how the different parts you put together helped communicate that message.

In my image I was trying to communicate the message that I am open to creating my future. I chose an image of my where I looked very excited, with my eyes looking up. The font text I chose matched the drink I was holding in my cup, and my background is neutral image of an office/café space.

5. Submit answers to the following:
 - a. What questions did you have about the lab?
I have no questions with the lab. The connections between VS Code and Github are clearer as the weeks go by.
 - b. What was the hardest part of the lab?
The hardest part was Adobe Photoshop since I've never used it before. There were times when I made changes and didn't know how to reverse them, so I had to start over. This happened with the LinkedIn logo, and I spent a lot of time trying to figure out how to fix the image with this learning curve.
 - c. Rate your comfort level with this week's topics.
I rate this lab a 2
