

1. Site Map Questions

- a. Research at least 3 websites museum websites. Write down their URLs here.

- <https://www.musee-orsay.fr/en>

- <https://www.vam.ac.uk/south-kensington>

- <https://www.metmuseum.org/>

- b. What pages do the museum sites you researched have in common?

Each museum page opens to one large image that takes up the entire screen. From there is a selection of pages on the top of the screen that are linked to another page when you click on it. I also noticed how they utilize their logo as a “home page”. Each site was very easy to navigate, and they used basic fonts and colors.

- c. What pages are different or unique on the three sites?

On the Musee de Orsee’s site I liked how there is a search bar on the top of the collections page in case someone was looking for a particular piece of art. On this page there is also a constant movement of art moving to the left, which was not seen on any other page. On The Met’s page I liked how on clicking “Visit” we are not sent to a page, but rather a dropdown of different options appears. The content and design of the V&A were very appealing and easy to view as well.

- d. What are some good things about these sites and what don’t you like?

I like how the museum shows you what types of exhibits there are, and links them to a separate page to learn more about their history. Each site had a very clean design that might be the norm for museum sites. The only page I didn’t like was the V&A museum’s as I noticed how they did not include a moving video on their page, making everything feel static.

- e. Create your own museum site map with a home page and at least 8 sub pages. Make sure you have a title for the site map, home page, and second level pages.

1. Use <https://www.gloomaps.com> to create the sitemap and submit the link to your sitemap

<https://www.gloomaps.com/7QFAWkqK7w>

- f. Overall, I wanted my site to operate like a combination of the museum sites I researched. My museum has a What's On page to guide the user to our current and upcoming exhibits, with the Visit Us page right next to it to guide the user to the museum. Next, there are Ticket Offerings to offer different rates to various age groups, as well as a My Account section for the user to see if they have already purchased a ticket. Next, we have an about page to describe our beginnings, and an Archive page for the user to look at previous art we had put on. Finally, the Shop and Donate page are ways our museum generates revenue and directs the user to shop for merch or give back.
2.
 - a. Body background color: [#fff4e6](#)
 - b. Text color: [#3c2f2f](#)
 - c. Link color: [#4b3832](#)
 - d. Heading color: #854442
 - e. Site Navigation Background: #670826
 - f. Site Navigation Highlight Color: [#adcbe3](#)
 - g. Site Navigation Link Color: #FFFFFF0
